

MIXWELL

MW-5R ink mixer

New High-speed Oscillating Type Ink Mixer

Features:

- Best ink mixing performance with very short mixing time. The Ink/Paste Viscosity can be up to 400,000 cps.
- The stirring blade is Not necessary for the ink mixing. Much easier to keep the working place clean.
- Oscillating speed can be adjusted through the control panel (0 ~ 1680rpm).
- Automatic cut-off safety switch.
- Adjustable timer control (Max. upto 10 min.).

Applications:

Screen Printing Ink(UV/Solvent/Water Base Type), Conductive Gold/Silver Paste, Carbon Conductive Ink, Mobile Phone Window Adhesive, Solder Resist, Golden/Silver/Plain Powder to be mixed with the Ink, or any Liquid Material to be mixed (especially suitable for UV Ink),etc.

Specifications	
Model	MW - 5R
Mixing Capacity	0.5 ~ 5 L (Max. Dia.230 x H220mm)
Time Control	0 ~ 10min.
Machine Dimension	380 x 430 x 930 mm
Chamber Dimensions	240 x 240 x 230 mm
Oscillating Speed	Adjustable(0~ 1680rpm)
Power Supply	AC 110/220V 50/60Hz, 1ph
Output Current	0.4 KW
Machine Weight	70 Kg

Option: Vacuum Function (Model: MW-5RV)
